AID for Programmatic Decision Making

GBVIMS+

There are two new functionalities available in GBVIMS+ v2: the GBV Case Management Outcome Scales and Key Performance Indicators.

Scales & KPIs

These two functionalities make up part of a survivor's digital case file stored in the GBVIMS+, increasing access to and use of actionable information on the outputs and impact of cornerstone GBV programming to inform organizational responses.

The Companion Guide

The accompanying guidance document contributes to a holistic understanding of GBV Case Management processes, and includes the two new functionalities.

Three Parts of the Companion Guide

Part 1:
Case Management Forms

Part 2:
Remote Supervision

Part 3:
Monitoring & Evaluation

Availability

The GBV Case Management Outcome Scales and KPIs are available in GBVIMS+v2, while the Companion Guide will be publicly available for GBV service providers!
